

COVID-19 Vaccine – Find a Vaccinating Pharmasave Near You

Public health is providing COVID-19 vaccines to community pharmacies across the province. The following Pharmasave pharmacies are participating in the provincial immunization campaign. We expect more Pharmasave pharmacies to participate as vaccine supply increases.

Vaccination appointments will be released as vaccine supply is available. If you cannot find an appointment time that works for you, please check back frequently. Due to high demand and limited supply, there may be limited availability.

Eligibility for the COVID-19 vaccine will be confirmed before vaccination. Pharmasave pharmacists are unable to provide the COVID-19 vaccine to ineligible patients even if they have an appointment.
